DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claim 22 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 22 generally recites "A computer readable medium having computer-executable components comprising". The Examiner does not know what Applicants are claiming? The Specification provides no support for such claim language. What do Applicants mean by "computer-executable components"? The Examiner is unable to determine if "computer-executable components" are tangible or intangible because the specification does not support either one.

Allowable Subject Matter

2. Claims 1-21 are allowed.
